

# Venture AFRICA

## About the game

Packs of lions roam the plains while crocodiles ambush prey from the banks of the Nile. Be the last to survive the great migration across the Serengeti!

*Venture Africa* is a two-player game in the style of Chess. It features a modifiable gameboard, 40 plastic molded African animals, and a simple ruleset. Games last approximately 60 minutes.

## Inspiration

*Venture Africa* is based on the video game, Wildlife Tycoon: Venture Africa (WT:VA). WT:VA was a Grand Prize finalist in the 2006 Independent Games Festival and the 2006 Slamdance Gamemaker Competition. It has sold over 100,000 copies for the PC and Mac and has become a cult hit amongst fans of “Sim” games. WT:VA was followed by Venture Arctic, which was awarded Sim Game of the Year by GameTunnel, a leading source on “indie” games. Venture Dinosauria is currently in development.

## What We Can Do For You

Pocketwatch Games can handle graphic design for the gameboard and the manual, as well as 3D modeling for the game pieces. We can also handle box design, though we are happy to have Kosmos handle that process since you are more familiar with the board game market. If Kosmos would like to do any of this in-house, that is fine with us too.

## Get In Touch!

If you are interested in publishing *Venture Africa*, let us know what we can do to make the game more appealing to your customers. We are flexible!
